Job Code: #11677
Title: Android Developer
Date Posted: 07/27/2015
Job Location: Sunnyvale California

Job Description:

RESOLVIT
Bringing Solutions That Make Business Better

Take your career to the next level as a **Android Developer** with Resolvit. We've grown 68% over the last five years and have been included on the Inc. 5000 list of America's fastest-growing companies four times. How? We hire the best in their fields – results-focused professionals with the skills to achieve project goals across multiple industries.

Are You Up to the Challenge?

Put your Android skill set to work by helping invent the next generation of eCommerce and integrating experiences that leverage the store, the web, and mobile platforms. As the **Android Developer**, you will work with world-class technologists and product visionaries as a contributing member of the core engineering team. You will utilize Java and other related technologies to design and develop high-performance and scalable applications for use within the product ecosystem. You will also help the team leverage and contribute to open-source software whenever possible, lay out the foundation for the platform, and propose solutions to ease the software development and monitoring processes.

What You'll Need to be Successful:

- More than 2 years of experience in native mobile application development
- Bachelor's degree in computer science or the equivalent
- Experience with the Android platform, including Intents, Services, Fragments, Maps, and more
- Have released at least one application into the Google Play Store, either independently or as part of a company
- Java proficiency
- Experience interfacing with RESTful APIs
- Competence with Linux and Git
- Experience with test-driven development (TDD)
