Apple Inc. has announced the launch of its new artificial intelligence (AI) assistant, Siri, which is designed to be more powerful and more personalized than ever before. The new Siri is available on all of Apple's mobile devices, including the iPhone, iPad, and Apple Watch. It can now perform a wide range of tasks, such as making reservations, ordering food, and even controlling smart home devices. Apple also announced that it has updated its iOS operating system to include a new feature called "Screen Mirroring," which allows users to mirror their iPhone or iPad screen onto their Apple TV. Additionally, Apple has introduced a new feature called "CarPlay," which allows users to use their iPhone's apps and features while driving in a car.
