

A stylized illustration of a human brain composed of glowing circuit lines and nodes, symbolizing artificial intelligence or neural networks. The brain is formed by a dense network of white lines representing circuit traces, with numerous small, brightly colored spheres (blue, green, red, yellow) acting as nodes or data points. The overall shape is a silhouette of a human head in profile, facing right, with the internal structure being the circuitry. The background is solid black, making the glowing elements stand out.
