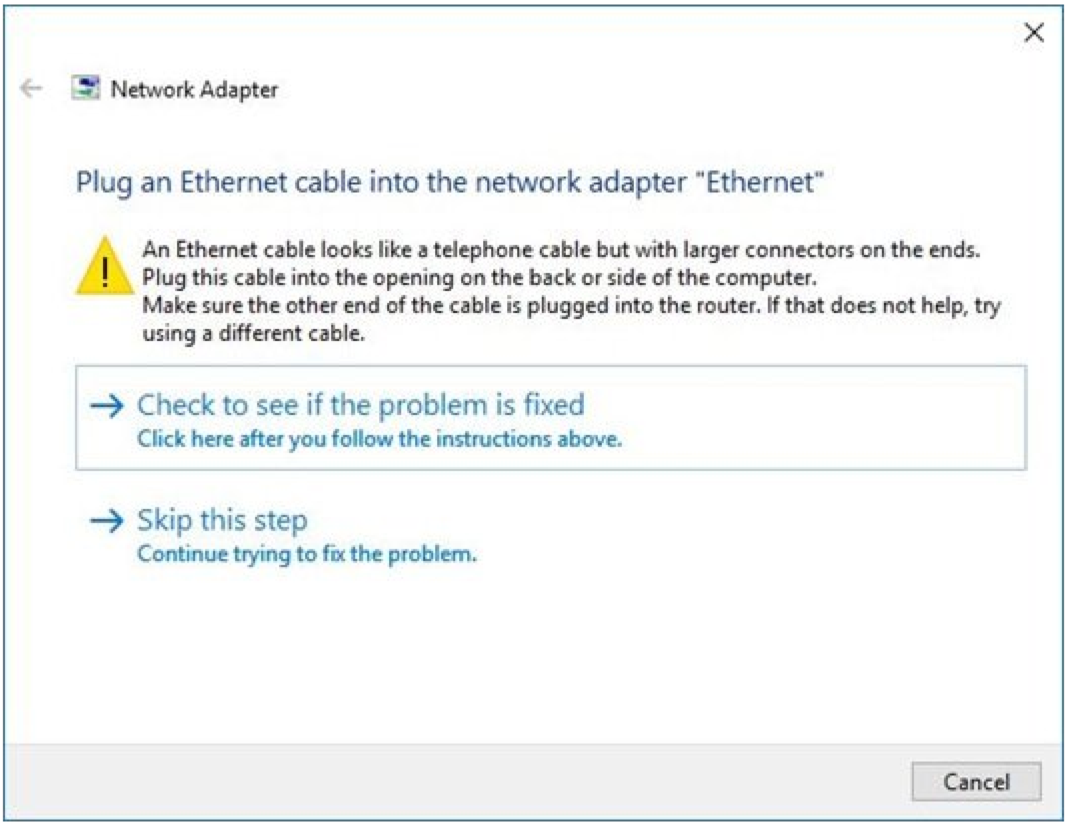
Select the network adapter to diagnose

If you're not sure, select the last option in the list.

- Ethernet
- VMware Network Adapter VMnet1
- VMware Network Adapter VMnet8
- Ethernet 2
- Ethernet 3
- All network adapters

[illegible] VMWare [illegible] VirtualBox [illegible].

[illegible] Check [illegible].



Network Adapter

Plug an Ethernet cable into the network adapter "Ethernet"

An Ethernet cable looks like a telephone cable but with larger connectors on the ends. Plug this cable into the opening on the back or side of the computer. Make sure the other end of the cable is plugged into the router. If that does not help, try using a different cable.

→ Check to see if the problem is fixed
Click here after you follow the instructions above.

→ Skip this step
Continue trying to fix the problem.
