A black Netgear Nighthawk X10 wireless router is shown from a rear-three-quarter perspective. It features four large, adjustable antennas. The rear panel includes a power switch, a power button, a power jack, a power LED, a WAN/Internet port (yellow), and five LAN/Ethernet ports (black). The Netgear logo and model name are visible on the bottom edge of the rear panel.

A woman with long blonde hair, wearing a black and white horizontally striped long-sleeved shirt and dark blue jeans, is standing in a bright room. She is wearing a VR headset and holding it with her right hand, looking upwards. To her left, on a white surface, is a black Wi-Fi router with four antennas. To her right is a potted plant with large green leaves. The background is a plain white wall and a window with white blinds.
