A 3D rendering of a blue brain connected to a green circuit board, symbolizing the intersection of neuroscience and technology. The brain is positioned centrally, with several thin, light blue wires extending from its base and sides, connecting to various components on the circuit board. These components include a large black integrated circuit, a yellow capacitor, a black cylindrical component, and several smaller electronic parts. A multi-colored ribbon cable is also connected to the brain's right side. The circuit board itself is green with intricate gold-colored traces and various electronic components, creating a complex, futuristic scene.
