Google Analytics 3

Google Analytics 3 (GA3) is a web analytics service that tracks and reports website usage. It provides detailed information about website visitors, including their location, device, and behavior. GA3 is widely used by businesses and organizations to understand their website performance and make data-driven decisions. The service is available for free and can be integrated with various websites and applications. It offers a range of reporting options, including real-time data, and can be customized to track specific metrics and events. GA3 also provides insights into user behavior, such as how long they stay on the website and which pages they visit. This information can be used to optimize the website and improve the user experience. The service is available for free and can be integrated with various websites and applications. It offers a range of reporting options, including real-time data, and can be customized to track specific metrics and events. GA3 also provides insights into user behavior, such as how long they stay on the website and which pages they visit.
