A horizontal row of ten empty square boxes, intended for children to draw or write in.

10 Hiberfil.sys

The screenshot shows the Windows Settings application window. The title bar reads "Settings". On the left, a sidebar lists various settings categories: Home, Find a setting, System, Display, Notifications & actions, Power & sleep (which is selected and highlighted in blue), Storage, Tablet mode, Multitasking, Projecting to this PC, Shared experiences, and Remote Desktop. The main content area is titled "Power & sleep". It contains three sections: "Screen", "Sleep", and "Save energy and battery life". The "Screen" section has a dropdown menu set to "15 minutes" under the heading "When plugged in, turn off after". The "Sleep" section has a dropdown menu set to "Never" under the heading "When plugged in, PC goes to sleep after". The "Save energy and battery life" section includes a descriptive text about setting screen sleep times and a link to "Get more info about saving PC energy". At the bottom right, there is a red-bordered box containing "Related settings" and "Additional power settings".

. Choose what the power buttons do

Change settings that are currently unavailable
Hibernate Shutdown settings .
Save changes

Define power buttons and turn on password protection

Choose the power settings that you want for your computer. The changes you make to the settings on this page apply to all of your power plans.
