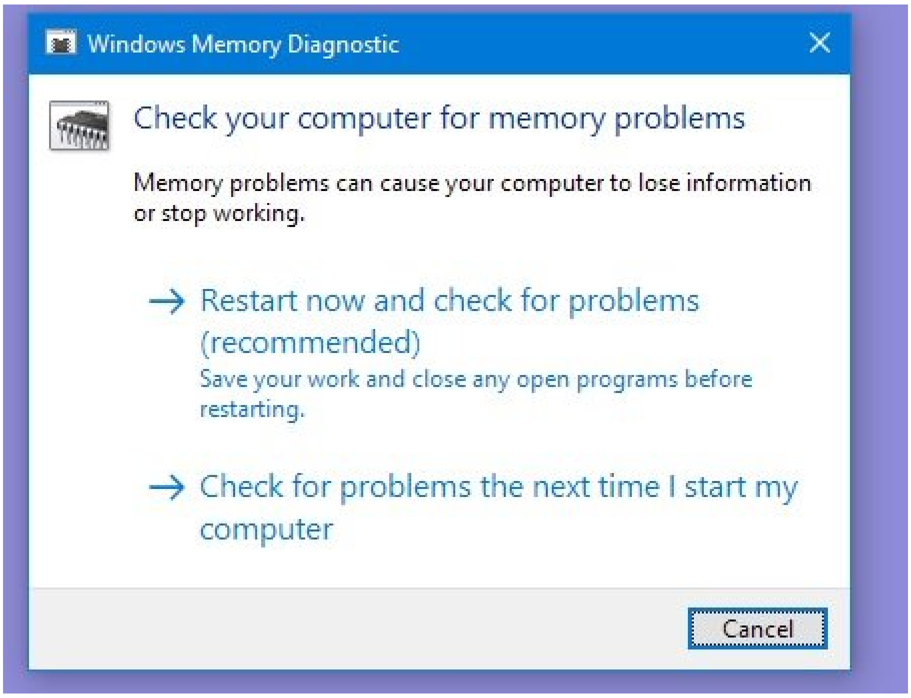
Windows Memory Diagnostic



Check your computer for memory problems

Memory problems can cause your computer to lose information or stop working.

→ Restart now and check for problems (recommended)
Save your work and close any open programs before restarting.

→ Check for problems the next time I start my computer

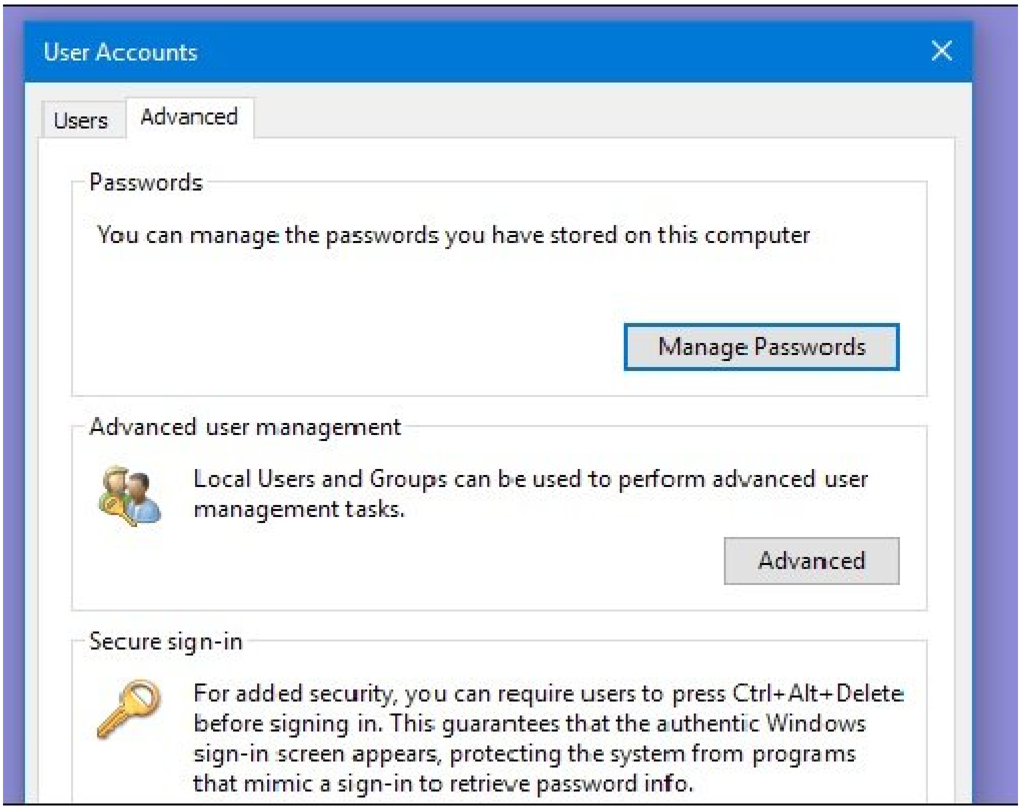
User Account Tools



You can manage the passwords you have stored on this computer

Local Users and Groups can be used to perform advanced user management tasks.

For added security, you can require users to press Ctrl+Alt+Delete before signing in. This guarantees that the authentic Windows sign-in screen appears, protecting the system from programs that mimic a sign-in to retrieve password info.

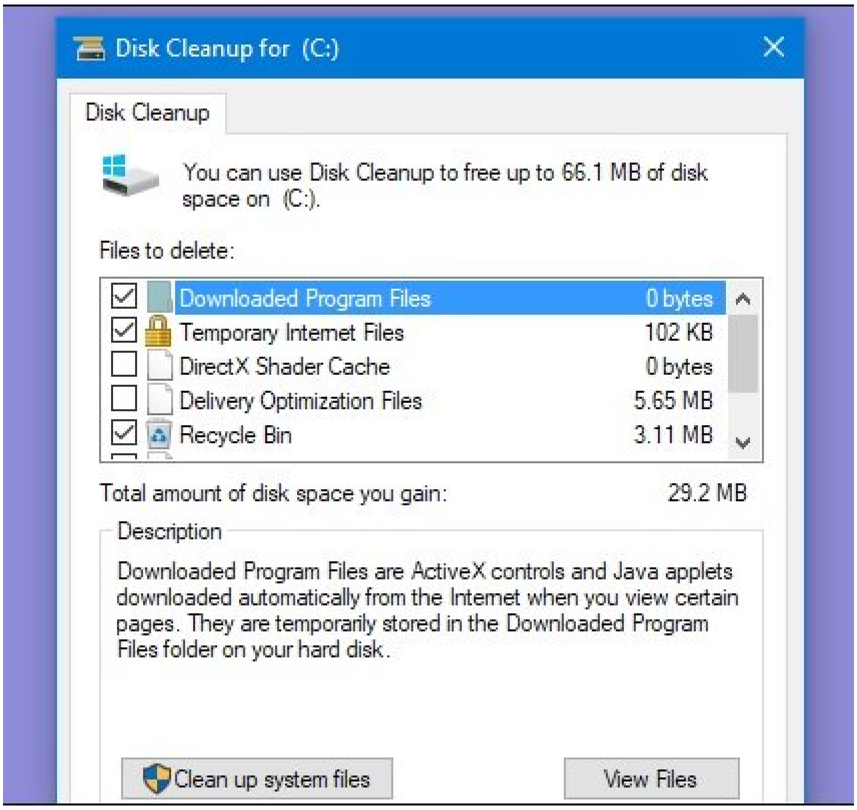
Disk Cleanup



You can use Disk Cleanup to free up to 66.1 MB of disk space on (C:).

☑	Downloaded Program Files	0 bytes
☑	Temporary Internet Files	102 KB
☐	DirectX Shader Cache	0 bytes
☐	Delivery Optimization Files	5.65 MB
☑	Recycle Bin	3.11 MB

Total amount of disk space you gain: 29.2 MB

Downloaded Program Files are ActiveX controls and Java applets downloaded automatically from the Internet when you view certain pages. They are temporarily stored in the Downloaded Program Files folder on your hard disk.
