Advanced options

By default, we're dynamically optimizing the amount of bandwidth your device uses to both download and upload Windows and app updates, and other Microsoft products. But you can set a specific limit if you're worried about data usage.

Download settings

☐ Limit how much bandwidth is used for downloading updates in the background

Choose how updates are delivered

Updates from more than one place

Download Windows updates and apps from other PCs in addition to Microsoft. This can help speed up app and update downloads.
Learn more

When this is turned on, your PC may also send parts of previously downloaded Windows updates and apps to PCs on your local network or PCs on the Internet, depending on what's selected below.

Off

Get updates from Microsoft, and get updates from and send updates to

● PCs on my local network

○ PCs on my local network, and PCs on the Internet

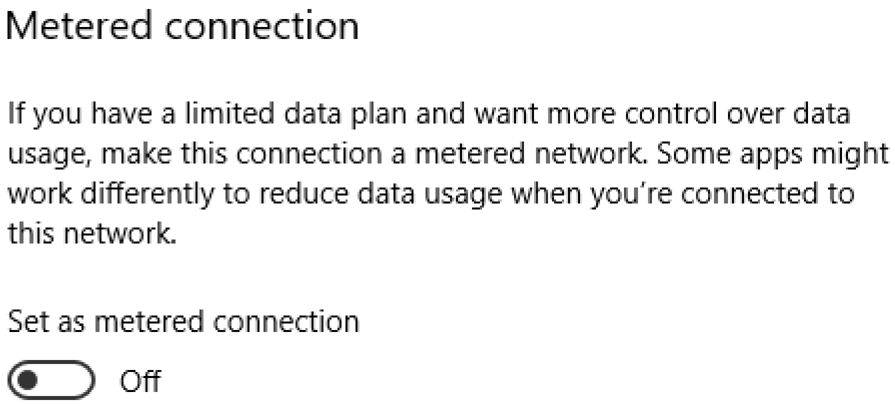
[illegible] Metered [illegible] Settings -> Network & Internet -> Wi-Fi [illegible] Set as metered connection [illegible] On [illegible].



Metered connection

If you have a limited data plan and want more control over data usage, make this connection a metered network. Some apps might work differently to reduce data usage when you're connected to this network.

Feedback & diagnostics

Diagnostic and usage data

Select how much data you send to Microsoft

● Basic: Send the data necessary to keep Windows up to date and secure

○ Full: Help us fix things and improve Microsoft products and services. Send additional diagnostic data (including browser, app and feature usage, and inking and typing data) to Microsoft.

Let Microsoft provide more tailored experiences with relevant tips and recommendations by using your diagnostic data
