How to Recover Your Lost & Deleted Data on Android

**Note:** Please stop to use your Android phones or tablets and try to retrieve the lost data as soon as possible after finding you lost your data.

Step 1: Connect Your Android Device to Computer

Launch EaseUS MobiSaver for Android Free and connect your Android device to computer using a USB cable. Then click "Start" button and next the software will quickly try to recognize and connect your device.

Step 2: Scan Your Android Device to Find Lost Data

It will automatically scan your device and analyze the data. Then it can help you fully find out all your lost files. During the scanning process, the software will display all the found files in real-time.

**Note:** Before scanning, please make sure that the battery of your device is more than 20%, to ensure a complete scan.

How to Recover Your Lost & Deleted Data on Android

**Note:** Please stop to use your Android phones or tablets and try to retrieve the lost data as soon as possible after finding you lost your data.

Step 3: Preview The Recoverable Data on Android Device

All these found file are classified into well-organized categories according to different file types. You can choose any type of file to preview them on the right side of the window one by one.

**Note:** Deleted SMS and contacts are shown in red. You can separate them by the color. Besides, you can enable "**Only display deleted items**" options to list deleted files only. It can help you save much of your time.

How to Recover Your Lost & Deleted Data on Android

**Note:** Please stop to use your Android phones or tablets and try to retrieve the lost data as soon as possible after finding you lost your data.

Step 4: Recover Lost Data from Your Android Device

You can easily pick out the files you want to get back. Then mark those selected files and click "**Recover**" button to retrieve them from your Android device. Finally, you need to specify a folder on your computer to save all the recovered data.

**Note:** Please don't save the recovered files on your Android device until you make sure that you have got back all your lost data. Otherwise, some of your lost data that have not been retrieved maybe overwritten and you can not get them back forever.
