analysis of the initial question; perception of the main link in the causal chain and the main contradiction; perception of the direct causes of the existence of the conflict
search for and use of transformations to eliminate the contradiction by changing its causes; support of analogies and procedures from the practical experience of inventing
introduction of changes into the system, into systems in the environment, into methods for using the system; test of the usability of the solution's idea by using it for other technical tasks; assessment of the invention
