Hardware Acceleration

Hardware Acceleration is a feature that allows Firefox to use your computer's GPU to speed up rendering and scrolling. If you are experiencing performance issues, you may want to disable Hardware Acceleration. To do this, go to Settings > Advanced > Performance > Uncheck "Use hardware acceleration when available".

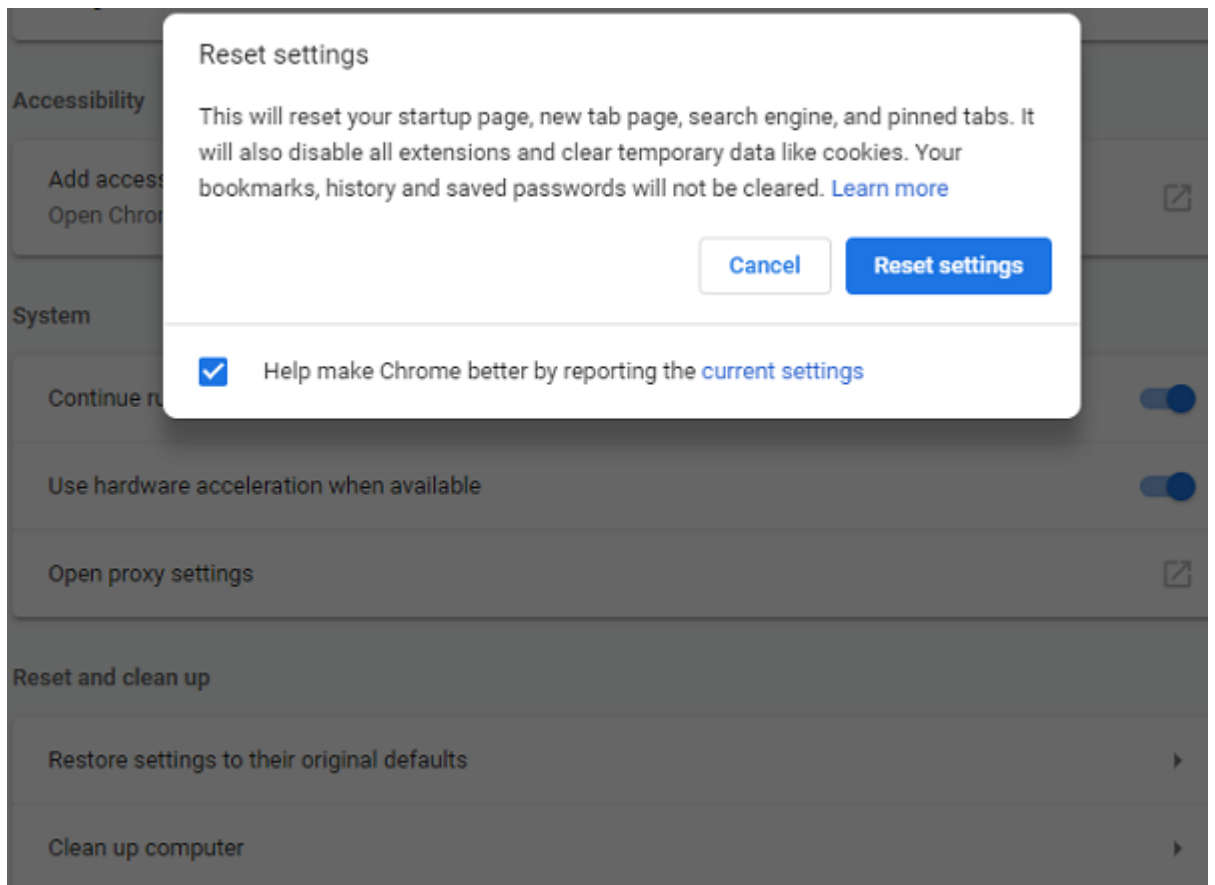

Hardware Acceleration is a feature that allows Firefox to use your computer's GPU to speed up rendering and scrolling. If you are experiencing performance issues, you may want to disable Hardware Acceleration.

Menu > Settings > System > Use hardware acceleration where available > Advanced

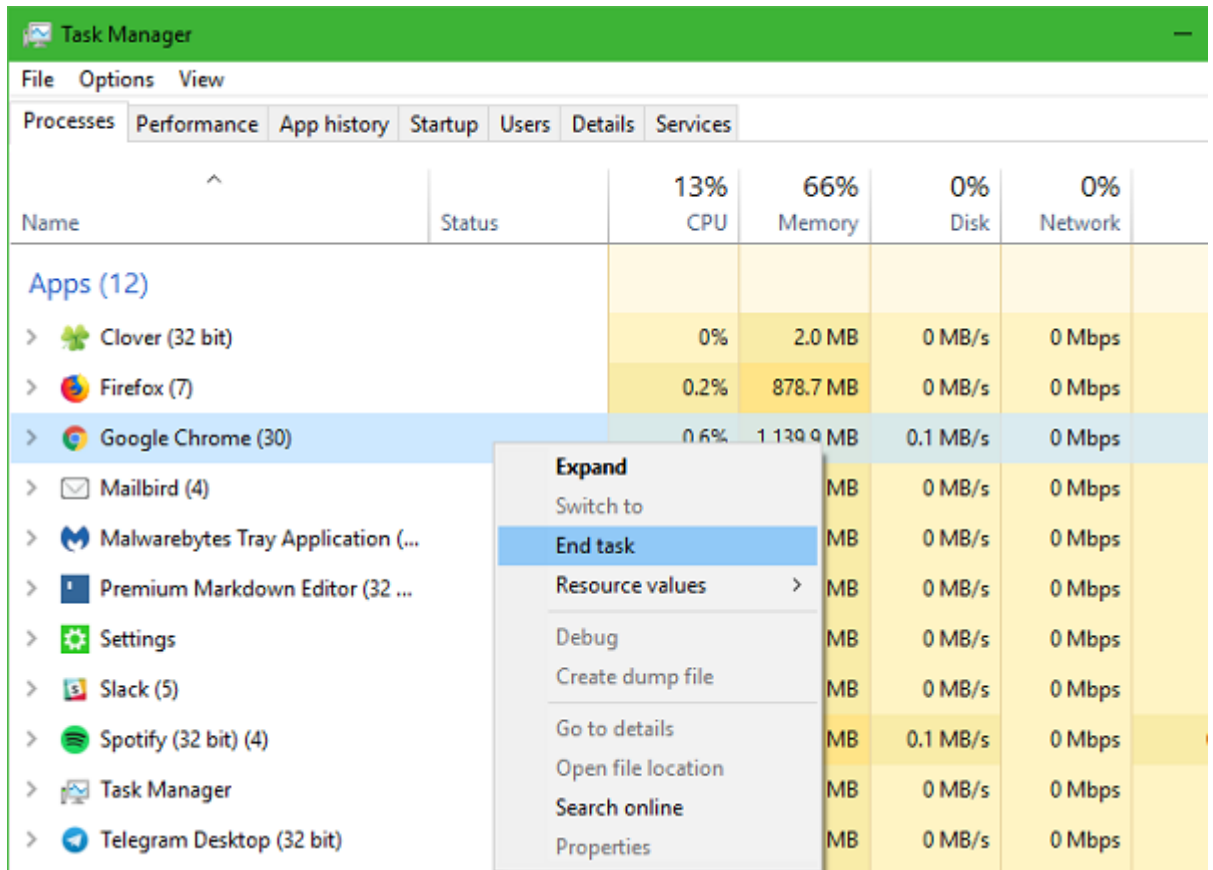

Use hardware acceleration where available

Use hardware acceleration where available. This can help speed up rendering and scrolling. If you're having trouble with a website, you can turn this off. For more information, see the help page.

Reset settings

Task Manager ın alt kısmında bulunan "End Task" seçeneğiyle Chrome'u kapatabilirsiniz.

Alternatif olarak, Ctrl + Shift + Esc tuşlarına basarak Task Manager'i açabilir ve Chrome'u "End Task" seçeneğiyle kapatabilirsiniz.
