## Wi-Fi Assist

Wi-Fi Assist is a feature that automatically uses cellular data when Wi-Fi connectivity is poor. You can turn it on or off in the Cellular settings. To turn it off, go to Settings > Cellular, scroll down to Wi-Fi Assist, and toggle the switch off.

## Background App Refresh

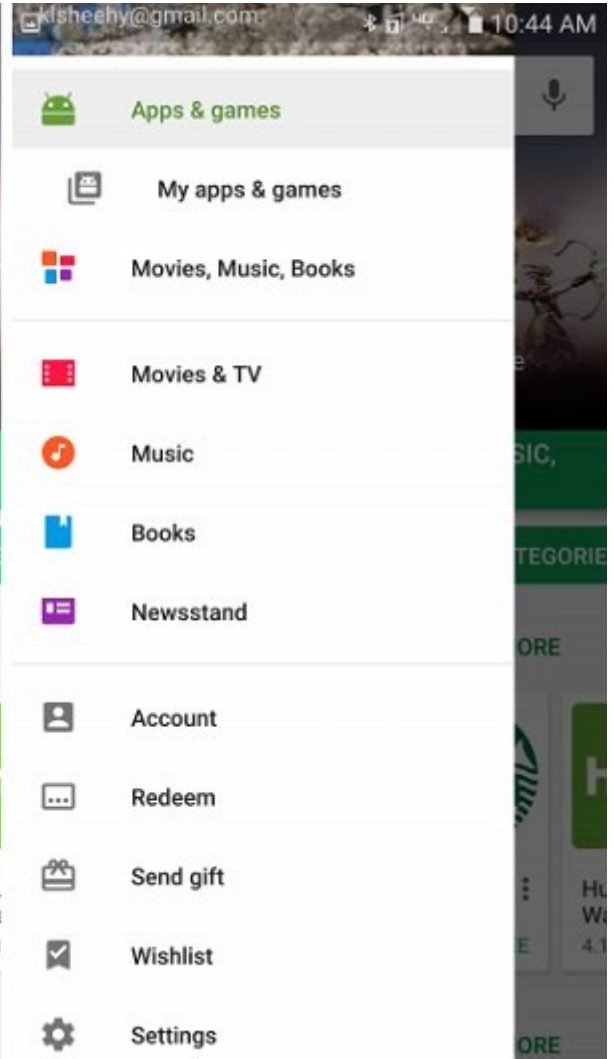

Background App Refresh is a feature that allows apps to refresh their content in the background. You can turn it on or off for individual apps or for all apps. To turn it off for all apps, go to Settings > General, scroll down to Background App Refresh, and toggle the switch off.

## Cellular Data Usage

Cellular Data Usage is a feature that shows you how much cellular data your apps are using. You can see the usage for individual apps or for all apps. To see the usage for all apps, go to Settings > Cellular, scroll down to Cellular Data Usage, and tap the chevron. To see the usage for individual apps, go to Settings > Cellular, scroll down to Cellular Data Usage, and tap the app icon.

Cellular Data Usage is a feature that shows you how much cellular data your apps are using.
