

!IoT and Edge Computing are the future of IT!

IoT and Edge Computing: The Future of IT

IoT and Edge Computing are the future of IT. IoT is the network of physical objects embedded with sensors, software, and other technologies for data exchange and monitoring. Edge computing is a distributed computing paradigm that brings computation and data storage closer to the location of data source.

IoT and Edge Computing are the future of IT. IoT is the network of physical objects embedded with sensors, software, and other technologies for data exchange and monitoring. Edge computing is a distributed computing paradigm that brings computation and data storage closer to the location of data source. (Edge computing)

IoT and Edge Computing are the future of IT. IoT is the network of physical objects embedded with sensors, software, and other technologies for data exchange and monitoring. Edge computing is a distributed computing paradigm that brings computation and data storage closer to the location of data source. IoT and Edge Computing are the future of IT. IoT is the network of physical objects embedded with sensors, software, and other technologies for data exchange and monitoring. Edge computing is a distributed computing paradigm that brings computation and data storage closer to the location of data source.

The chart illustrates a significant upward trend in projected revenue from 2015 to 2020. This growth is driven by the increasing adoption of cloud services and IoT devices. Key players in the market include Amazon, Microsoft, Google, and various IoT manufacturers. The revenue is expected to reach 5,635 million by 2020.

The market is projected to reach a total value of 5.6 billion by 2020, with a CAGR of 25.5% from 2015 to 2020.

Fog computing is a distributed computing paradigm that extends cloud computing to the edge of the network. It is designed to support a wide range of IoT devices and applications. OpenFog is a leading provider of fog computing solutions. The market for fog computing is expected to grow rapidly, reaching 5.6 billion by 2020.
