Camera shortcut

Add a shortcut on your Camera app that jumps to Google Photos

Location

Google Photos is a free app that lets you store and share your photos and videos. It's available on Android and iOS. To get the most out of Google Photos, you should enable the "Back up & sync" feature. This will automatically upload your photos and videos to the cloud. You can also use the "Free up device storage" feature to remove original photos and videos from your device that are already backed up. Google Photos also offers face grouping, which groups photos of similar faces together. You can also enable the "Camera shortcut" feature to add a shortcut to the Google Photos app on your camera app. Finally, you can enable the "Google Drive" feature to show Google Drive photos and videos in your Photos library. To access these features, go to the Settings app and tap on "Google Photos". Then, tap on "Back up & sync" and toggle the switch on.
