

This image shows two RAM modules side-by-side for comparison. The top module is a DDR4 RAM stick, which is black with a white label. It has a long, narrow gold-plated edge connector. The bottom module is a DDR3 RAM stick, which is green with a white label and a blue sticker. It has a wider gold-plated edge connector. Red arrows point to the respective labels: 'DDR4' for the top module and 'DDR3' for the bottom module.
