

The diagram illustrates the process of pollen identification. On the left, a 'Pollen identification network' is shown as a stack of 3D rectangular blocks, representing the layers of a neural network. An arrow points to the right, where an 'Authentication' tree structure is shown, consisting of a root square node, two circular nodes, and four leaf circular nodes. This represents the classification or authentication process based on the network's output.

Authentication process

[Pollen identification network authentication process](#)

The diagram illustrates the process of pollen identification. On the left, a 'Pollen identification network' is shown as a stack of 3D rectangular blocks, representing the layers of a neural network. An arrow points to the right, where an 'Authentication' tree structure is shown, consisting of a root square node, two circular nodes, and four leaf circular nodes. This represents the classification or authentication process based on the network's output.
