

A screenshot of a web application titled "Colorize Photos". The background is a dark, high-contrast image of a forest path. The title "Colorize Photos" is in large white font. Below it, a subtitle reads "Use Deep Learning to Automatically Colorize Black and White Photos". A dark grey rectangular box contains the input area. Inside this box, the text "Paste the URL to an image to colorize it" is above a white text input field. The input field contains the URL "https://upload.wikimedia.org/wikipedia/commons/4/4d/Beef_Portrai". To the right of the input field is a purple button with a white camera icon and the text "Colorize It". Below the input field, the text "Or, try these sample images:" is followed by five small square thumbnails of black and white images: a landscape with a body of water, a vintage car, a person in a field, a person sitting, and two cows.

2000 年 10 月，苹果公司（Apple）在 Mac OS 9 操作系统中首次引入了“颜色管理”（Color Management）功能。这一功能的引入，标志着苹果在色彩管理方面迈出了重要的一步。
