3. Language and input

4. Physical keyboard

5. The first step is to go to the 'LANGUAGE AND INPUT' settings page. This page is located in the 'Settings' app under the 'System' tab. Once you are on this page, you will see several options. The first option is 'Language'. Under this option, you will see 'English (United States)' selected. To change the language, you need to tap on 'English (United States)'. This will open a list of available languages. In this list, you need to select 'English (US)'. Once you have selected 'English (US)', you will see a confirmation message. Tap on 'OK' to confirm the change. The second step is to go to the 'Default keyboard' option. This option is located under the 'KEYBOARDS' section. Tap on 'Default keyboard'. This will open a list of available keyboards. In this list, you need to select 'Multilingual typing - Gboard'. Once you have selected 'Multilingual typing - Gboard', you will see a confirmation message. Tap on 'OK' to confirm the change. The third step is to go to the 'On-screen keyboard' option. This option is located under the 'KEYBOARDS' section. Tap on 'On-screen keyboard'. This will open a list of available on-screen keyboards. In this list, you need to select 'Gboard'. Once you have selected 'Gboard', you will see a confirmation message. Tap on 'OK' to confirm the change. The fourth step is to go to the 'Physical keyboard' option. This option is located under the 'KEYBOARDS' section. Tap on 'Physical keyboard'. This will open a list of available physical keyboards. In this list, you need to select 'Gboard'. Once you have selected 'Gboard', you will see a confirmation message. Tap on 'OK' to confirm the change. The fifth step is to go to the 'Show Keyboard button' option. This option is located under the 'KEYBOARDS' section. Tap on 'Show Keyboard button'. This will open a toggle switch. If the toggle switch is turned off, tap on it to turn it on. If the toggle switch is turned on, tap on it to turn it off. The sixth step is to go to the 'INPUT ASSISTANCE' section. This section is located under the 'LANGUAGE AND INPUT' settings page. Tap on 'INPUT ASSISTANCE'. This will open a list of options. In this list, you need to select 'Spelling correction'. Once you have selected 'Spelling correction', you will see a confirmation message. Tap on 'Off' to turn off the spelling correction. The seventh step is to go to the 'Autofill service' option. This option is located under the 'LANGUAGE AND INPUT' settings page. Tap on 'Autofill service'. This will open a list of available autofill services. In this list, you need to select 'Autofill with Samsung Pass'. Once you have selected 'Autofill with Samsung Pass', you will see a confirmation message. Tap on 'OK' to confirm the change. The eighth step is to go to the 'Personal dictionary' option. This option is located under the 'LANGUAGE AND INPUT' settings page. Tap on 'Personal dictionary'. This will open a list of available personal dictionaries. In this list, you need to select 'Gboard'. Once you have selected 'Gboard', you will see a confirmation message. Tap on 'OK' to confirm the change. The ninth step is to go to the 'SPEECH' section. This section is located under the 'LANGUAGE AND INPUT' settings page. Tap on 'SPEECH'. This will open a list of options. In this list, you need to select 'Text-to-speech'. Once you have selected 'Text-to-speech', you will see a confirmation message. Tap on 'OK' to confirm the change.
