

A green Android robot icon is positioned to the left of a smartphone. The smartphone screen displays the 'Memory' settings page for the last 3 hours. The screen shows 'Average memory use' as 3.5 GB, a 'Performance' bar graph, 'Total memory' as 3.8 GB, 'Average used (%)' as 92%, and 'Free' memory as 323 MB. It also lists 'Memory used by apps' as 5.7 apps used memory in the last 3 hours. The background is a dark, textured wooden surface.

1. Developer options: This option is used to enable various developer features. It is located in the System settings menu.

2. Memory: This option is used to view the memory usage of the device. It is located in the Developer options menu.

3. Take bug report: This option is used to capture a bug report from the device. It is located in the Developer options menu.

4. Desktop backup password: This option is used to set a password for the desktop backup. It is located in the Developer options menu.

5. Stay awake: This option is used to keep the screen awake while charging. It is located in the Developer options menu.

6. Enable Bluetooth HCI snoop log: This option is used to enable the Bluetooth HCI snoop log. It is located in the Developer options menu.

7. OEM unlocking: This option is used to allow the bootloader to be unlocked. It is located in the Developer options menu.

8. Running services: This option is used to view and control currently running services. It is located in the Developer options menu.

9. WebView implementation: This option is used to select the WebView implementation. It is located in the Developer options menu.

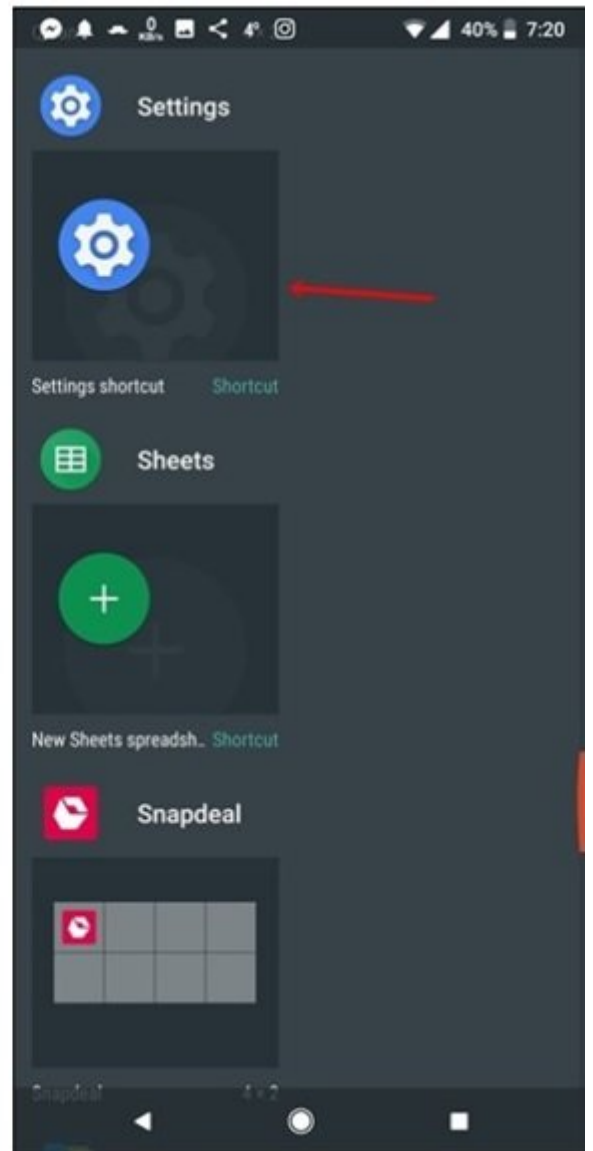

10. Automatic system updates: This option is used to enable automatic system updates. It is located in the Developer options menu.

11. System UI demo mode: This option is used to enable the System UI demo mode. It is located in the Developer options menu.

Memory used by apps. The screenshot shows the memory usage of the device over the last 3 hours. The average memory use is 3.5 GB, which is 92% of the total memory (3.8 GB). The performance is normal. The free memory is 323 MB. The memory used by apps is 57 apps used memory in the last 3 hours. The screenshot also shows a dropdown menu for selecting the time range for the memory usage statistics, with options for 3 hours, 6 hours, 12 hours, and 1 day.
