WiFiKill app grab button is used to grab the MAC addresses of the devices that are connected to the WiFi network. The app will then display a list of the devices with their IP addresses, MAC addresses, and manufacturer names. The user can then select the devices they want to kill by clicking on the 'kill all' button.

WiFiKill app is a tool that can be used to kill a device's internet connection. It works by sending a packet that causes the device to disconnect from the network. This can be useful for testing purposes or for security reasons. However, it should be used responsibly and only on devices that you own or have permission to test.
