Windows 10 Settings > Update & Security > Windows Update > Advanced Options > Delivery Optimization > Advanced Options

Advanced options

By default, we're dynamically optimizing the amount of bandwidth your device uses to both download and upload Windows and app updates, and other Microsoft products. But you can set a specific limit if you're worried about data usage.

Download settings

☐ Limit how much bandwidth is used for downloading updates in the background

45%

Upload settings

☐ Limit how much bandwidth is used for uploading updates to other PCs on the Internet

50%

☐ Monthly upload limit

500 GB

Note: when this limit is reached, your device will stop uploading to other PCs on the Internet.

Windows 10 Settings > Update & Security > Windows Update > Advanced Options > Delivery Optimization > Advanced Options

NetLimiter

NetLimiter (Quality of Service (QoS) rules) is a software application that allows you to control the bandwidth usage of various applications and services on your network. It provides a user interface for configuring rules to limit or prioritize traffic, ensuring that critical services receive the necessary bandwidth while less important tasks are throttled. This helps in managing network congestion and improving overall network performance.
