Windows could not find a driver for your network adapter. This may be because the device is new or the driver is not installed. Windows will search for the driver for you, but it may not find it. If you have the driver, you can install it manually. For more information, see Windows Help and Support.

10

□□□□ □ □ □□□□□□ .4

Windows could not find a driver for your network adapter.
This may be because the manufacturer does not have a Windows driver for this device or because the driver is corrupt or missing.
