이 단계를 완료한 후, VPN 서버의 IP 주소 설정을 확인합니다. ... Edit 버튼을 클릭하여 VPN의 DirectAccess 설정을 확인합니다. 이 설정을 통해 VPN 서버가 DirectAccess 클라이언트와 통신할 수 있도록 합니다. VPN Configuration 페이지에서 IP 주소 설정을 확인합니다. 이 설정을 통해 VPN 서버가 DirectAccess 클라이언트와 통신할 수 있도록 합니다. RRAS 서버의 VPN 설정을 확인합니다. 이 설정을 통해 VPN 서버가 DirectAccess 클라이언트와 통신할 수 있도록 합니다. DirectAccess 클라이언트의 설정을 확인합니다. 이 설정을 통해 VPN 서버가 DirectAccess 클라이언트와 통신할 수 있도록 합니다.

Network Topology
Network Adapters
Authentication
VPN Configuration

Specify how IP addresses are assigned to remote clients connecting over VPN, and configure the authentication method for remote users.

IP Address Assignment
Authentication

Address assignment method:

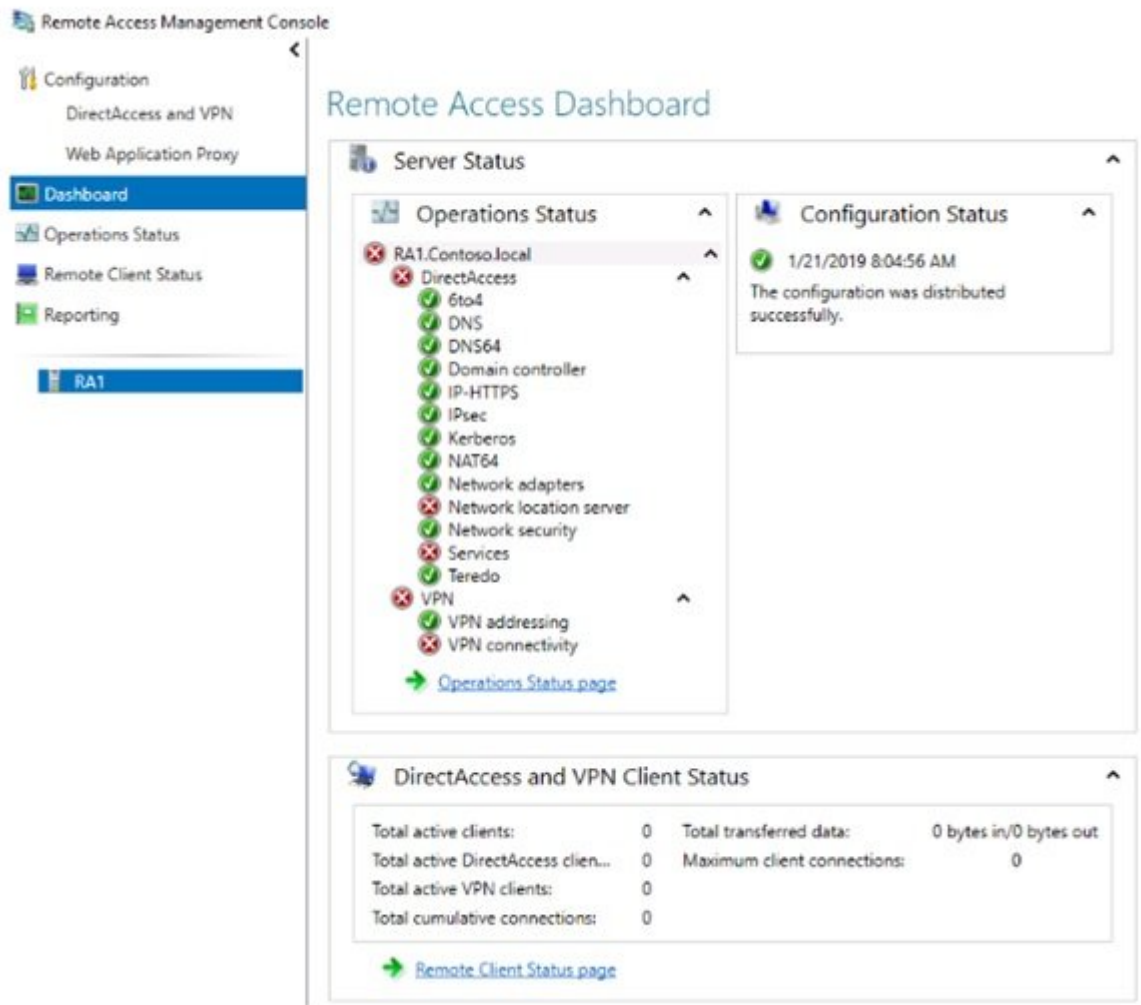

☒ Assign addresses automatically
With this option enabled, addresses are assigned by a DHCP server.

☐ Assign addresses from a static address pool
Add IP address ranges to the static pool. Addresses are assigned from the first range before continuing to the next.

	From	To	Number

Remote Client Status

Remote Client Status (Remote Client Status) is a tool that allows you to view the status of remote clients. It provides a list of clients and their status, including whether they are connected to the network and whether they are using DirectAccess or VPN. You can also view the status of the network location server and the status of the network security services. The Remote Client Status tool is located in the Operations Status window.

Reporting

The Reporting tool is used to generate reports on the status of remote clients. It provides a list of clients and their status, including whether they are connected to the network and whether they are using DirectAccess or VPN. The Reporting tool is located in the Remote Client Status window.

The Reporting tool is used to generate reports on the status of remote clients. It provides a list of clients and their status, including whether they are connected to the network and whether they are using DirectAccess or VPN. The Reporting tool is located in the Remote Client Status window.
