Select the role services to install for Remote Access

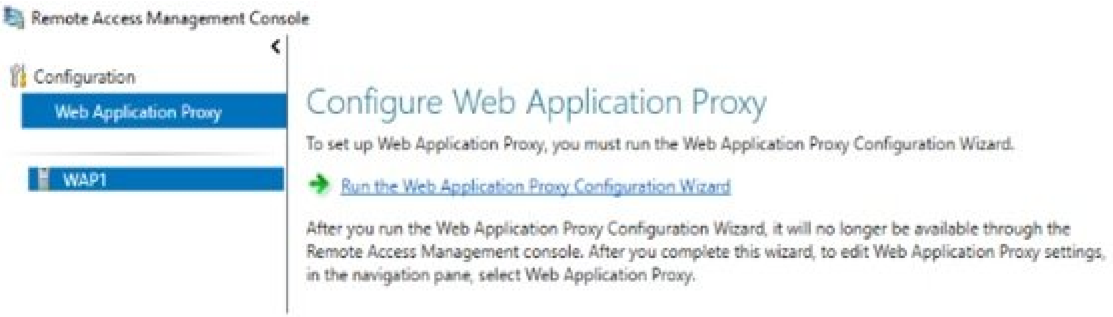
Role services

☐ DirectAccess and VPN (RAS)
☐ Routing
☑ Web Application Proxy

Description

Web Application Proxy enables the publishing of selected HTTP- and HTTPS-based applications from your corporate network to client devices outside of the corporate network. It can use AD FS to ensure that users are authenticated before they gain access to published applications. Web Application Proxy also provides proxy functionality for your AD FS servers.

[illegible] Configuration [illegible] Web Application Proxy Configuration Wizard [illegible].



Configure Web Application Proxy

To set up Web Application Proxy, you must run the Web Application Proxy Configuration Wizard.

Run the Web Application Proxy Configuration Wizard

After you run the Web Application Proxy Configuration Wizard, it will no longer be available through the Remote Access Management console. After you complete this wizard, to edit Web Application Proxy settings, in the navigation pane, select Web Application Proxy.
