Wireless Basics

This page is used to configure the parameters for wireless LAN clients which may connect to your Access Point. Here you may change wireless encryption settings as well as wireless network parameters.

Wireless Network

Enable SSID Broadcast: ☑

Enable Wireless Isolation: ☐

Name (SSID) : goli_net

Mode : 802.11b/g/n

Channel: Auto Current Channel: 11

Band Width : Auto 20/40M

Security Options

Security Options : WPA-PSK/WPA2-PSK AES

Security Options(WPA-PSK+WPA2-PSK)

Pre-Shared Key: abd17hsirah (8-63 characters or 64 hex digits)

Helpful Hints...

NOTE:To ensure proper agency compliance and compatibility between similar products in your area, the operating channel and region must be set correctly.

Placement of the Router to Optimize Wireless Connectivity

The operating distance or range of your wireless connection can vary significantly based on the physical placement of the router. For best results, place your router:

- Near the center of the area in which your PCs will operate.
- In an elevated location such as a high shelf.
- Away from potential sources of interference
