[illegible][illegible]

A close-up photograph of the internal components of an iPhone, specifically the Taptic Engine. The component is a rectangular, silver-colored metal plate with the Apple logo and the words "TAPTIC ENGINE" printed on it. It is mounted within a black plastic housing. To the right of the Taptic Engine is a large, circular black component, likely the camera lens or a microphone. The entire assembly is secured with several screws. A faint, stylized logo is visible in the bottom right corner of the image.
