HP Sprout computer system is a high-end, all-in-one device designed for professional use. It features a large, high-resolution monitor that can be used as a touch screen. The system also includes a large, flat touchpad for additional input. A 3D scanner is mounted on top of the monitor, allowing for the creation of 3D models of physical objects. The system is powered by a high-performance processor and includes a large amount of memory and storage. It is designed to be used in a professional setting, such as a design studio or a research laboratory.
