A detailed view of the upper body and arms of the Atlas robot. The robot's torso is covered in a complex network of black cables and wires. A prominent blue, fan-like sensor or light is visible on the front of the chest. The 'Boston Dynamics' logo is printed in white on a black rectangular plate located just below the neck. The robot's arms are extended, showing the intricate mechanical joints and black plastic components of the upper limbs. A yellow warning light is mounted on top of the head assembly. The background is a blurred industrial or laboratory setting with black structural elements.
