Better Protection from Malware and Phishing Websites

When you navigate to a website that has been reported as malicious, you will see a red screen with a warning. This gives you a clear path back to safety with one click.

Windows Defender Browser Protection is a new feature in Windows 10 that helps protect you from malware and phishing websites. It works by scanning websites for known threats and blocking access to unsafe sites. When you visit a website that has been reported as unsafe, you will see a red warning screen with a 'Back to Safety' button. This gives you a clear path back to safety with one click. Windows Defender Browser Protection is available in Windows 10 version 1809 and later. To learn more about this feature, visit <https://support.microsoft.com/windows/learn-more-about-windows-defender-browser-protection>.

You're In Control

The dropdown allows you to turn Windows Defender Browser Protection on or off, provide feedback and learn more about the extension.
