FileASSASSIN can remove locked files from your system.
It uses advanced techniques to unlock and optionally remove the file.

For command line switches click here.

FileASSASSIN loaded, please select a file.

Drag a file into the text area or click the (...) button and select a file.

● Attempt FileASSASSIN's method of file processing:

- ☑ Unlock locked file handles.
- ☑ Unload modules
- ☑ Terminate the file's process
- ☐ Delete file

○ Use delete on Windows reboot functions.
○ Use normal 'delete function'.
