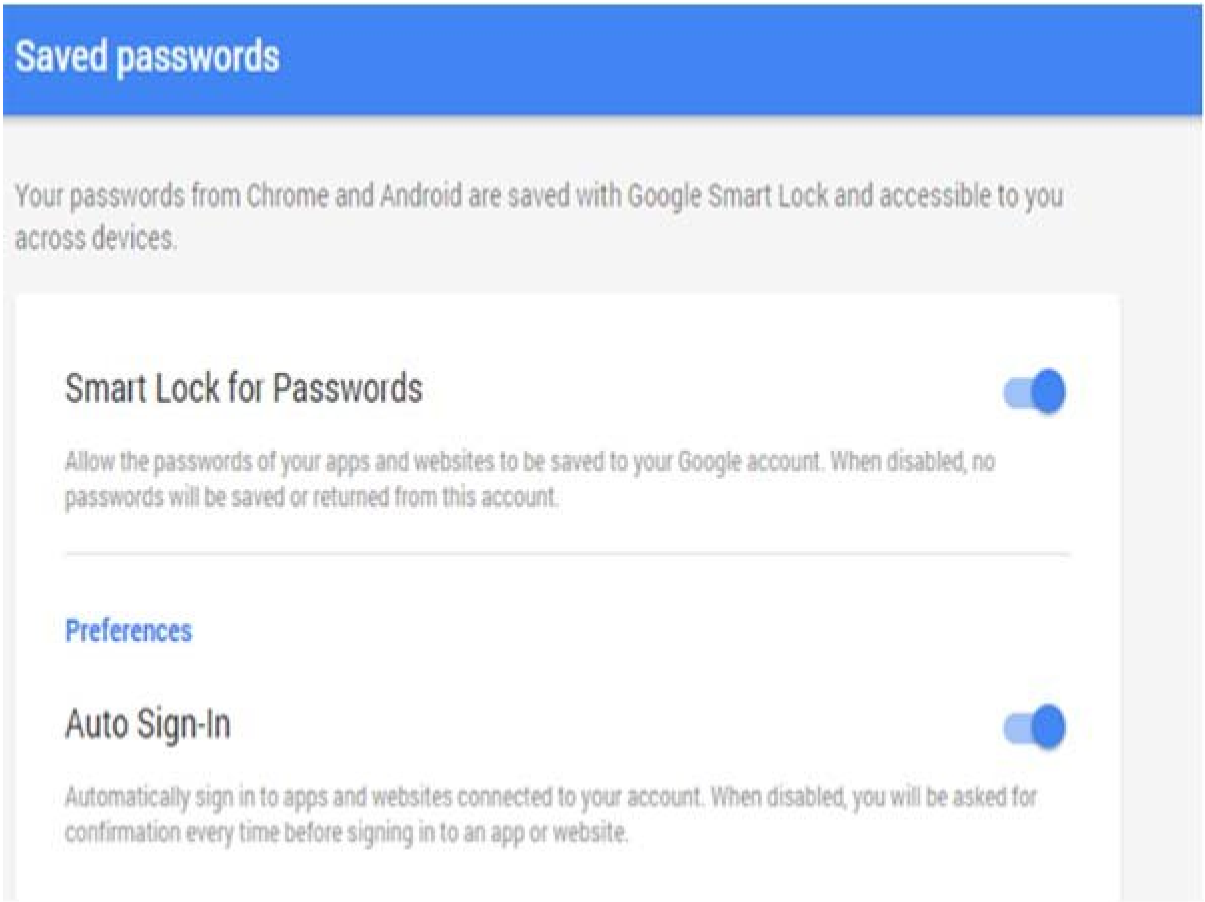
Smart Lock

[illegible]

Google I/O [illegible]

[illegible]



Saved passwords

Your passwords from Chrome and Android are saved with Google Smart Lock and accessible to you across devices.

Smart Lock for Passwords

Allow the passwords of your apps and websites to be saved to your Google account. When disabled, no passwords will be saved or returned from this account.

Preferences

Auto Sign-In

Automatically sign in to apps and websites connected to your account. When disabled, you will be asked for confirmation every time before signing in to an app or website.

GENERATE PASSWORD

Use this online password generator to create a secure, random password. Password generation is done client-side (on your computer) using JavaScript. This means that LastPass never has access to any of the passwords you generate here. If you're using LastPass, you would only have to remember one master password, and LastPass can generate passwords for you on all of your sites.

Password Length 10

☑A-Z ☑a-z ☑0-9 ☐Special

Minimum Digit Count 1

☐Avoid Ambiguous Characters

☑Require Every Character Type
