Windows 10 has a Dark theme that you can enable. This changes the color of the Windows interface to a dark theme. To enable the Dark theme, you need to go to the Windows Settings application and select the Personalisation category. Then, you need to select the Colours category. In the Colours category, you can see a list of colors and a 'Dark' theme option. You can click on the 'Dark' theme option to enable it. This will change the color of the Windows interface to a dark theme.
