BreachAlarm

The screenshot shows a BreachAlarm notification window. The window has a red border and a red 'X' icon. The text inside reads: 'Password compromised! A password associated with your email address has been compromised at least 2 time(s). The most recent recorded incident is June 1, 2016. You should change any of your passwords that you created before this date as soon as possible. Do not reuse the same password across multiple sites!'. Below this, there is a yellow box with the text: 'Get more detail and notifications of future breaches! BreachAlarm's Email Watchdog will let you know if your email address appears in any future breaches.' and a green button that says 'Activate Email Watchdog for FREE'. In the background, there is a banner for '150 million accounts this past year' and a 'Guest Post' section with the number '746,309,500'.

이메일 주소가 해킹당했는지 확인하고 비밀번호를 변경해야 합니다. Have I Been Pwned는 BreachAlarm과 유사한 서비스입니다. Have I Been Pwned는 이메일 주소가 해킹당했는지 확인하고 비밀번호를 변경해야 합니다.

Sucuri SiteCheck

The screenshot shows the Sucuri SiteCheck results page. The page has a header 'Free Website Malware and Security Scanner'. Below the header, there are three tabs: 'SiteCheck Results', 'Website Details', and 'Blacklist Status'. The 'SiteCheck Results' tab is selected. The main content area has a red banner that says 'Warning: Your Website Has Been Blacklisted!'. Below the banner, there is a red circle with a white exclamation mark. The text next to it reads: 'Website: goooogleadsence.biz Status: Site Potentially Harmful. Immediate Action is Required. Web Trust: Blacklisted (10 Blacklists Checked): Indicates that a major security company (such as Google, McAfee, Norton, etc) is blocking access to your website for security reasons. Please see our recommendation below to fix this issue and restore your traffic.' Below this, there is a table with the following columns: 'Scan', 'Result', 'Severity', and 'Recommendation'. The table has three rows: 1. 'Website Blacklisting' (Detected, Critical, CLEAN UP, Clean Up & Remove Blacklisting), 2. 'Site Likely Compromised' (Detected, Critical, CLEAN UP, Clean Up & Remove Blacklisting), 3. 'Website Firewall' (Not Found, Medium Risk, PATCH AND PROTECT, With Sucuri Firewall).

Scan	Result	Severity	Recommendation
Website Blacklisting	Detected	Critical	CLEAN UP Clean Up & Remove Blacklisting
Site Likely Compromised	Detected	Critical	CLEAN UP Clean Up & Remove Blacklisting
Website Firewall	Not Found	Medium Risk	PATCH AND PROTECT With Sucuri Firewall

Pwned Passwords

Pwned Passwords

Pwned Passwords are half a billion real world passwords previously exposed in data breaches. This exposure makes them unsuitable for ongoing use as they're at much greater risk of being used to take over other accounts. They're searchable online below as well as being downloadable for use in other online system. [Read more about how HIBP protects the privacy of searched passwords.](#)

pwned?

Oh no — pwned!

This password has been seen 2 times before

This password has previously appeared in a data breach and should never be used. If you've ever used it anywhere before, change it!
