How do you want to search for drivers?

→ Search automatically for updated driver software
Windows will search your computer and the Internet for the latest driver software for your device, unless you've disabled this feature in your device installation settings.

→ Browse my computer for driver software
Locate and install driver software manually.

Power Options

Control Panel › All Control Panel Items › Power Options

Control Panel Home

Require a password on wake-up

Choose what the power buttons do

Choose what closing the lid does

Create a power plan

Choose when to turn off the display

Change when the computer sleeps

Choose or customise a power plan

A power plan is a collection of hardware and system settings (like display brightness, sleep, etc.) that manages how your computer uses power. Tell me more about power plans

Plans shown on the battery meter

● Balanced (recommended) — Change plan settings

Automatically balances performance with energy consumption on capable hardware.

○ Power saver — Change plan settings

Saves energy by reducing your computer's performance where possible.

Hide additional plans

○ High performance — Change plan settings

Favours performance but may use more energy.
