Boot Camp Assistant
Select Tasks
Boot Camp Assistant will help you perform one or more of the following tasks. Select all the tasks you need to perform:
Create a Windows 7 or later version install disk
You need a USB flash drive and a Windows 7 or later version ISO image.
Download the latest Windows support software from Apple
The support software, designed specifically for each Mac, is required to fully support Windows and includes Boot Camp drivers that let you use your Apple keyboard, mouse, trackpad, and built-in camera. If you create a Windows 7 or later version install disk from a USB flash drive, the support software is copied to it. Otherwise, you need a blank CD, DVD, or external drive formatted as MS-DOS (FAT).
Install Windows 7 or later version
This allows you to add a Windows partition and start the installation process, or remove an existing Windows partition from your Mac. If your Mac has multiple hard disks, you can also erase a second disk for use exclusively with Windows. You must use a single full-install Windows installation disc. You cannot use an upgrade version of Windows.

Boot Camp Assistant
Create a Partition for Windows
Each operating system requires its own partition on the disk. Drag the divider to set the size of the partitions, or click the Divide Equally button.
"Macintosh HD" will be partitioned as:
OS X
100 GB
78 GB free
Windows
20 GB
Divide Equally
Go Back
Install
