Active hours

Active hours lets us know when you usually use this device. When a restart is necessary to finish installing an update, we won't automatically restart your device during active hours.

Note: We'll check to see if you're using this device before attempting to restart.

Start time

8	00	AM

Use a custom restart time

When a restart is scheduled, this option is available to temporarily override active hours and schedule a custom time to finish installing the current update(s). Make sure your device is plugged in at the scheduled time.
