Chrome Task Manager - Memory Usage

Chrome Task Manager is a tool that allows you to view the memory usage of each tab and extension in your browser. It is a useful tool for identifying memory leaks and optimizing your browser's performance. The Task Manager shows a list of tabs and extensions, along with their memory usage, CPU usage, and network activity. You can click on a tab or extension to view more details, such as the URL, the page title, and the extension's name. You can also click on a tab or extension to close it, or to refresh the page. The Task Manager is a useful tool for monitoring your browser's memory usage and for identifying memory leaks.
