Android 5.0 Lollipop .14

Android 5.0 Lollipop is a major update to the Android operating system. It introduces a new visual language called 'Lollipop', which features a more rounded and friendly design. The update also includes several new features, such as the 'Now On Screen' app, which provides quick access to frequently used apps, and the 'Doze' feature, which helps to conserve battery life by putting the device into a low-power state when it's not in use. Additionally, Android 5.0 Lollipop introduces a new security feature called 'Project Butter', which aims to improve the overall performance and responsiveness of the system. The update is available for a wide range of devices, including smartphones, tablets, and wearables. For more information about Android 5.0 Lollipop, visit the official Android website.
