Max2Play Raspberry Pi Image

for Raspberry Pi 1 Model A/A+/B/B+, Pi 2 Model B, Pi 3 Model B, Pi Zero

Max2Play for the Raspberry Pi based on the official Raspbian Debian Jessie-Image.
After the start, the web interface can be reached through the browser at <http://max2play>
The sound cards of all listed manufactures can be installed with only one click. If booting without connected network cable and available WiFi interface (e.g. Pi Zero, RP13) a hotspot is started (name *max2play*, password *mypassword*) to setup WiFi by smartphone.

Download "Max2Play Raspberry Pi ALL (SD-Card Image based on Raspbian Jessie Lite)"

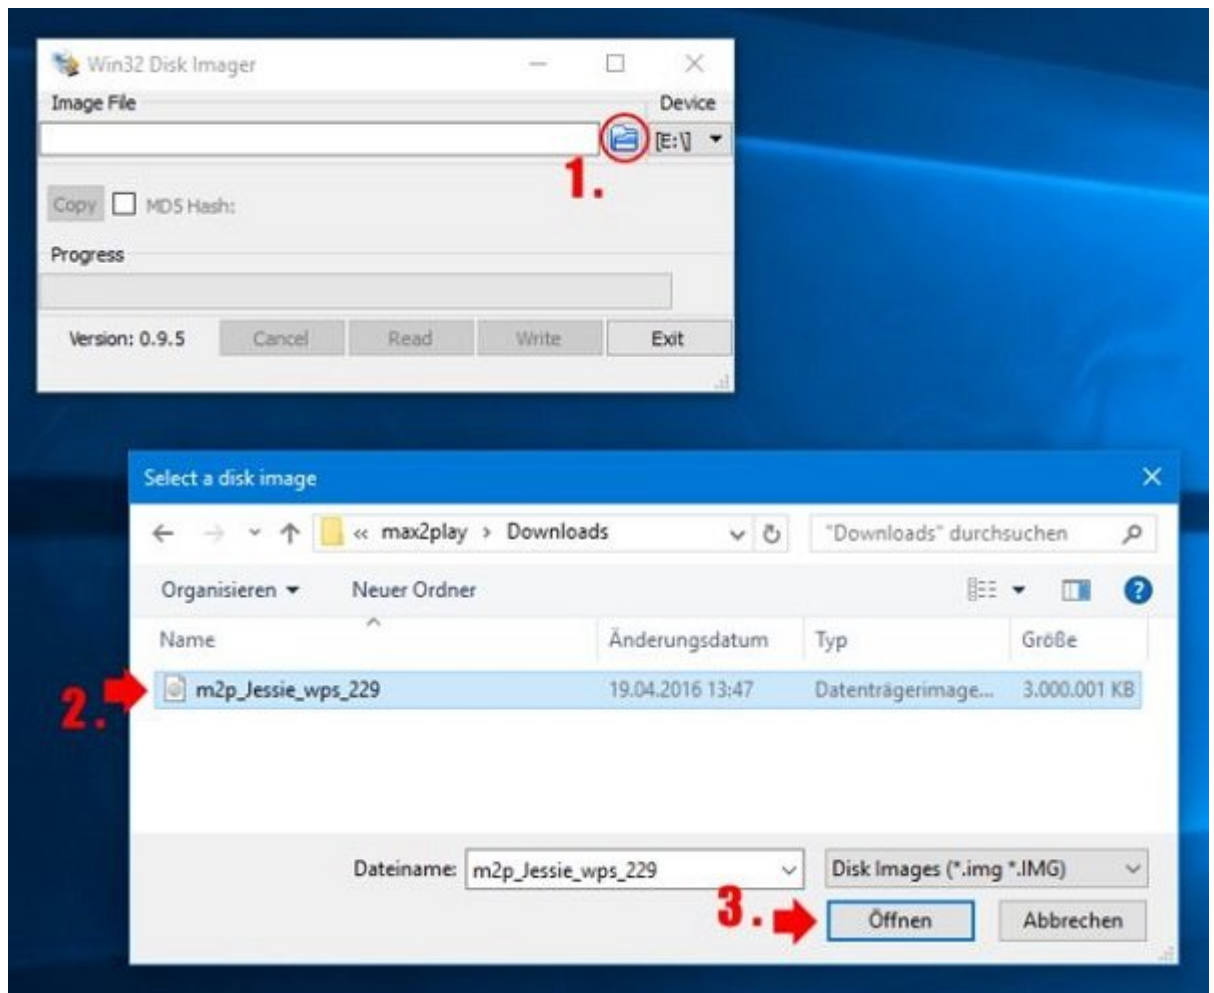

m2p_rpi_default_244_wps_ap_expand.img.zip – Downloaded 29180 times – 1 GB

Includes pre-configuration for:

- justboom
- HiFiBerry
- IQaudIO
- allo.com
- AUDIOPHONICS

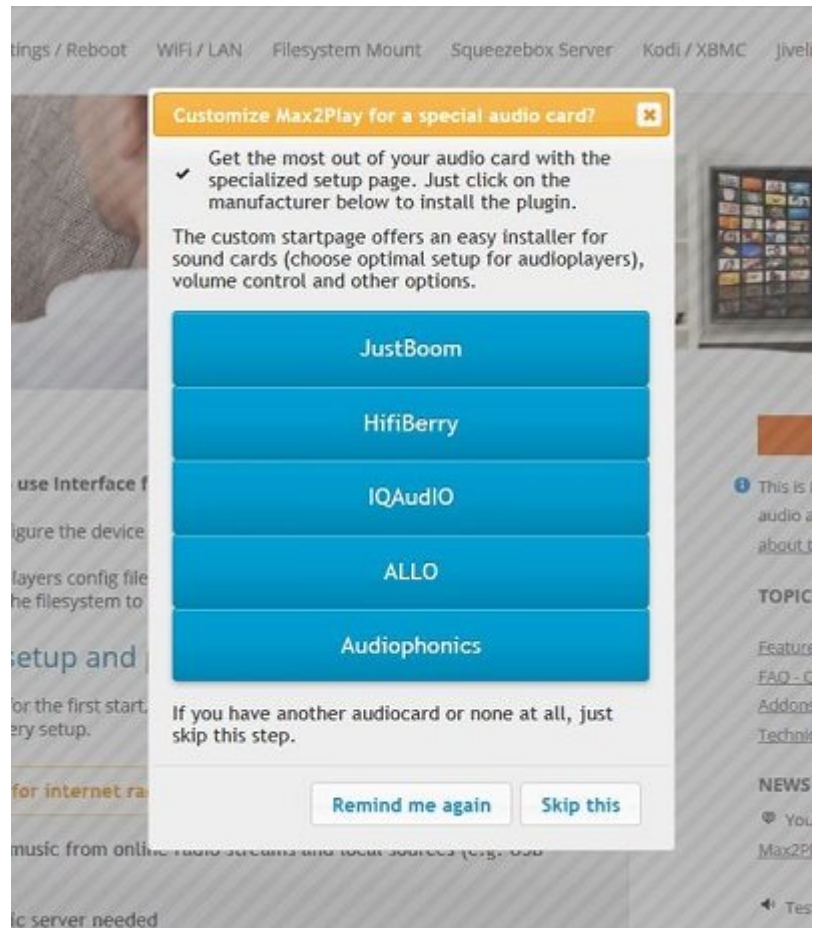

Buy pre-installed Max2Play Images on SD cards and eMMC modules

Remove accesspoint from this device

The accesspoint feature is currently installed and active. You have to uninstall the accesspoint-modus to get back to the normal usage of your WiFi. [uninstall](#)

Edit basic accesspoint settings

SSID	max2play	The name of this WiFi network
Passphrase	mypasscode	The WiFi passphrase for this network
WiFi Driver	Default	The Driver for WiFi. For the Raspberry Pi 3 you should choose nl80211, if something is not working. Otherwise leave empty.
Standalone	☐	The accesspoint redirects all external requests to itself and sets up a default gateway to its IP-adress. Always activate this, if the device is not connected to the internet and if there is no other router connected by LAN-interface. Otherwise the audioplayers (e.g. squeezelite) will not work correctly.
