Python - Tutorial

Python is a general-purpose interpreted, interactive, object-oriented, and high-level programming language. It was created by Guido van Rossum during 1985- 1990. Like Perl, Python source code is also available under the GNU General Public License (GPL). This tutorial gives enough understanding on Python programming language.

Learn how to program!

Everyone in the 21st century needs to learn to code, right? But not everyone needs to become a software engineer or computer scientist. *Automate the Boring Stuff with Python* is written for office workers, students, administrators, and anyone who uses a computer how to write small, practical programs to automate tasks on their computer.

You don't need to know all the complexities of algorithms and syntax, you just want to write basic programs to automate mundane computer tasks. In the process, even total beginners will learn to use Python to control their computers without having to learn complex information about computer science. This is a practical programming guide for the rest of us.
